Storage:	Please refer to the Product Specification Sheet.				
The conversion by way of slitting of plastic films and other materials (polystopolypropylene, polypropylene, laminated and heat-sealable substrates, compossubstrates, and paper) for direct food contact, envelope window film, label other commercial applications. With outsourced process of flexographic properforating, folding, sheeting, bag and pouch making.  Declaration of  Regulation (EU) No 10/2011 on plastic materials and articles intended to contact with food, inclusive of successive amendments (EU) 2020/124. 2023/1627 and 2023/1442.				able substrates, compostable elope window film, labels and rocess of flexographic printing, ng.	
	Regulation (EC) No 2023/2006 on good manufacturing practice for materials and articles intended to come into contact with food.				
Regulation (EC) No 1935/2004 on materials and articles in contact with The materials and articles in contact with food (England) Regulations 2					
	European Directive 94/62/EC on packaging and packaging wastage. Plus any amendments up to the date of this declaration.				
Declaration of Absence:	The above products have been certified to not intentionally contain Bisphenol A (BPA). A full list of absence products is available.				
Site Certification:	BRCGS Packaging Materials - Grade AA ISO9001:2015				
Product Usage:	The user shall verify themselves that the product is suitable for the intended use. For more information, please refer to the Product Specifications sheet.

## **Declaration of Compliance for Food Contact Film**

Declaration of Compliance for Food Contact Film					
Name of Supplier:	Multiplastics (Europe) Limited Page: 2 of 3				
Allergens: (Ref: 4.9.3.4)	Multiplastics have an Allergen Management Plan. Which has been developed to identify, control, educate and communicate any risk or presence of allergens on site, from raw materials through to finished products.				
	The aim is to minimise or eliminate the risk of contamination to and/or from the packaging and meet legal requirements for labelling in the country of sale.				
	An Allergen Policy (PSQMApp2) is in place which lists out the 14 allergens of concern, as identified in law. This Policy outlines the control of allergens within the site. As part of the hazard and risk analysis the risks from allergen contamination at each stage of the process have been assessed. This has been documented on QCD042 in the hazard analysis which covers all steps on site and assesses any potential risks there are in the delivery of contaminated raw materials.				
	Our purchased raw materials do not contain any known allergens. There are no maintenance consumables used by staff on site which contain allergens e.g. nut / soya oils. The likelihood of contamination of incoming raw materials or contamination of materials and products on site is seen as very low with the controls currently in place:				
	<ul> <li>Allergen Policy: PSQMApp2</li> <li>Personal Hygiene Rules: WI11</li> <li>Visitor Control: WI11, QCD068</li> <li>Processing &amp; Packaging: WI01, WI03</li> <li>Protective Clothing: WI11</li> <li>Incident Reporting: QPP017 Appendix</li> <li>Site Rules: QPP021, PSQM4.12</li> <li>Supplier Approval: QPP005, QCD045</li> <li>Goods Receipt: QPP006</li> </ul>				
	Cleaning: As there are no identified allergens within the production or warehouse areas there is no specific cleaning required to reduce the risk of allergen cross-contamination. Cleaning procedures are in place for all areas as required for good hygiene control (WI15).				
	Segregation: As there are no identified allergens in any raw material or finished product on site there is no requirement for any segregation of materials as there is no risk of cross-contamination.				
	Labelling: There are no allergens in any product supplied by Multiplastics (Europe) Ltd, therefore there is no allergen labelling required.				
	The allergen management plan shall be reviewed annually and when there is a change to raw materials, suppliers, the manufacturing process, machinery and equipment or if there is a change to cleaning practices and procedures.
